

information that was submitted in connection with the typographical error in the parent application.

The amendment above to Claims 18 and 32 adds a recitation of the method by which polarity is determined. The amendment finds support at page 4 line 31-page 6 line 16 of the specification. Claim 33 is amended to recite a Markush group that does not include CFCs in order that the claim can properly depend from Claim 32.

Turning now to the Office Action, Claims 18-46 have been subjected to an obviousness-type double patenting rejection over the claims of U.S. Pat. No. 5,225,183. Applicants submit herewith a terminal disclaimer in order to obviate the rejection.

Applicants call the Examiner's attention to the Information Disclosure Statement submitted herewith. Nothing cited therein is deemed to adversely affect patentability of the invention defined by the pending claims. Applicants also request that the Examiner return an initialed copy of the Form PTO 1449 submitted with the Information Disclosure Statements of 2 July 1993 and 16 May 1994.

Applicants respectfully request reconsideration, withdrawal of the rejection, and allowance of Claims 18-46.

Respectfully submitted,

16 November 1994
